# Handheld Contact

The leading mobile solution for Act!

Handheld Contact puts your business critical Act! data at your fingertips, anywhere, anytime, allowing you to manage all your contact & calendar details on your mobile device, even when you're offline.

New Features

- Create and manage Sales Opportunities and associated products/services from the Handheld Contact mobile app. [1]

- Access Tag Mode in the Contact List to tag Act! Contacts and instantly sort or perform a bulk action — such as mapping or sending an e-mail or SMS. [2]

- "Alerts" is a single place to review approaching Annual Events (like Birthdays or Anniversaries) and alarm-enabled activites while its daily device notifications ensure you don't forget.

- Share Act! Contacts from Handheld Contact at the press of a button as a vCard or using copy/paste. [2]

- Perform a Keyword Search directly from the home screen to find relevant Contact, Activity, History, Note, and Opportunity records.

- Export your Handheld Contact calendar to your mobile device's native calendar. [3]

- Improved home screen for easy access to all Handheld Contact features.

One subscription provides one device with:

- ► Unlimited data syncing
- ► Unlimited quality online support
- ► Free installation, setup, and software upgrades

Supported mobile devices:

- ► Apple iPhone and iPad
- ► Android smartphones and tablets

Definitive Mobile Solution for Act!

- Automatic, wireless syncing keeps data on the mobile device up to date.

- Offline access so you're never left hanging.

- Track every interaction: Includes calls, e-mails, and sms.

- Alarms that keep you in the loop and alert you using your device's notification system.

- Know who's calling before you answer with Caller ID.

- Create saved look-ups (up to 10 fields) with "Searches" — also supports e-mail blasts.

- Mark Contacts as Favorites for quick access.

- Record every detail with Voice To Text.

- The only solution designed for Act! and respects relationships between contacts, notes, histories, and activities.

- Helps maintain a high level of data integrity.

Powerful Act! Features

- Customize which standard and custom fields sync.

- Create and manage contacts, activities, notes & more.

- History is automatically created after a call is placed or an e-mail is sent.

- Makes scheduling a follow up after a phone call or e-mail hassle-free.

- Clear activities and schedule follow ups for one or many people.

- Quickly place calls and send e-mails directly from activity records.

- View and edit other Act! users' activities.
